

Simplify California FID Compliance with Advanced ERV Control

Provide the ventilation monitoring, control, and homeowner-friendly operation needed for today's high-performance homes.

KEY BENEFITS FOR BUILDERS AND CONTRACTORS

Support California Fault Indication Device (FID) Requirements

- Designed for use with approved S&P TRen ERV systems
- Provides the control and monitoring capabilities needed for compliant ventilation operation

Verify System Performance

- Real-time airflow (CFM) reporting
- Live fan power consumption monitoring
- Continuous system status visibility

Reduce Service Calls

- Automatic fault notifications
- Filter maintenance reminders
- Airflow and communication diagnostics for faster troubleshooting

Flexible Ventilation Control

- Adjustable minimum runtime settings
- Continuous or intermittent ventilation operation
- Boost mode for increased ventilation demand
- Low and high fan speed control

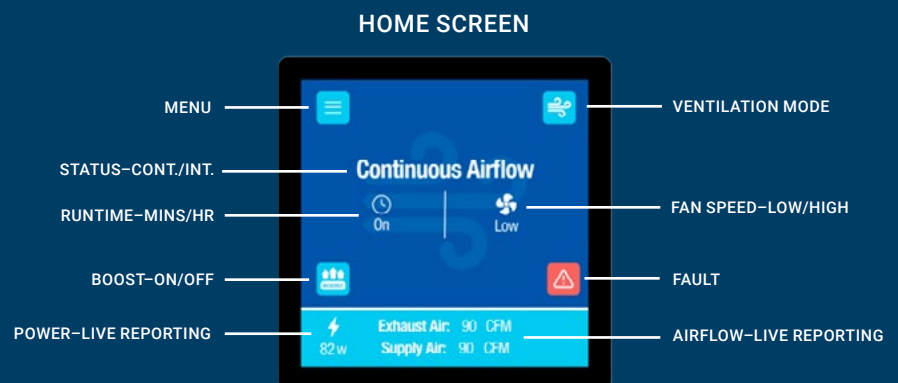

Built for Real-World Conditions

- Allows temporary shutdown of outside air intake during wildfire smoke events and poor outdoor air quality days
- Maintains homeowner control while supporting indoor air quality strategies

EVERYTHING YOU NEED TO MONITOR, CONTROL, AND VERIFY ERV PERFORMANCE

- Airflow (CFM) Reporting
- Power Consumption Monitoring
- Runtime Scheduling
- Fan Speed Control
- Fault Diagnostics
- Outdoor Air Control

Give homeowners greater visibility and control while helping ensure ventilation systems operate as designed.
