Dryer Exhaust Duct Power Ventilator

PROTECT YOUR HOME TODAY.

As laundry rooms move to more centralized locations in the home, longer and more complicated dryer duct runs are needed. Long and complex duct runs create a rise in static pressure resulting in a build up of lint that can lead to a house fire.

KEY FEATURES:

- UL 705 SAFETY Listed for Gas + Electric Dryers
- Complies with IRC 2018 Section M1502.4.4 Dryer Exhaust Duct Power Ventilators
- Extend dryer duct runs up to 120 feet
- Pressure Sensor for automatic operation with clothes dryer
- LED Light to indicate operation
